

ConnectNow – Real-time Web Chat Application

INTRODUCTION

This project is a feature-rich real-time chat application built using the MERN stack (MongoDB, Express.js, React, Node.js). The application allows users to register, create personalized profiles, join chat rooms, and engage in instant messaging.

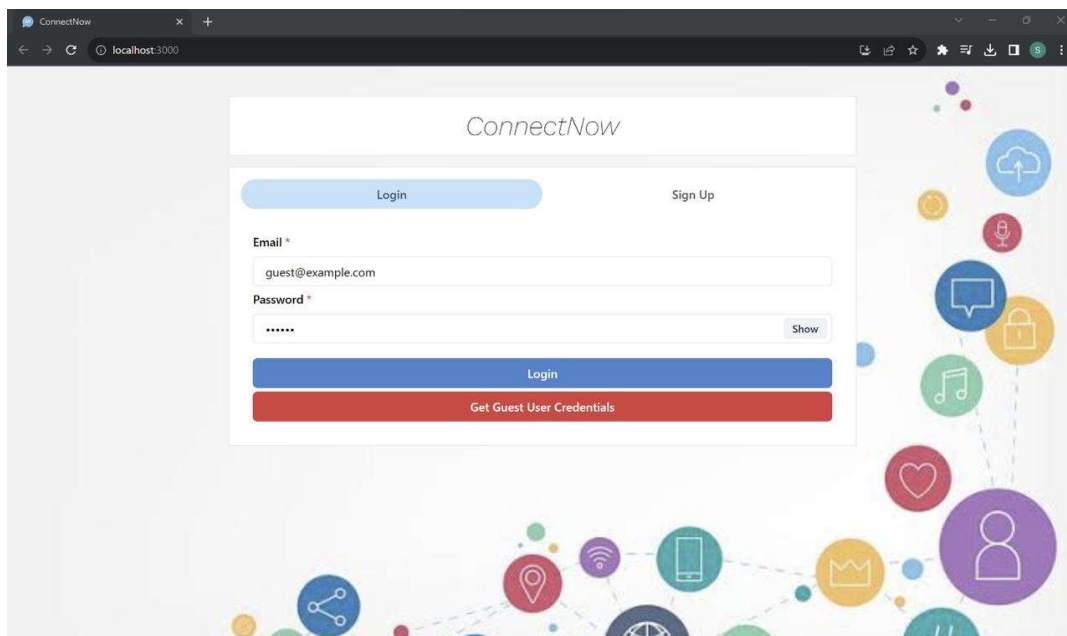

FEATURES

- **User Registration:** New users can sign up and create personalized profiles.
- **Chat Rooms:** Users can create and join multiple chat rooms.
- **Real-time Messaging:** Instant messaging with live updates using WebSockets.
- **User Profiles:** Personalized user profiles with profile photos.

TECHNOLOGIES USED

- **Frontend:** React
- **Backend:** Node.js, Express.js
- **Database:** MongoDB
- **Real-time Communication:** WebSockets
